ZENESIS™

HYBRID WHITE RESIN POLISHING PADS

New **ZENESIS™ Hybrid White Resin Polishing Pads** are specially designed to deal with the challenges of engineered stone. Higher resin content in today's engineered stone present problems for traditional polishing pads. Standard pads can leave unacceptable swirl marks and scratches in your edge polish. Many colored pads can bleed and stain light colored Engineered Stones. The new ZENESIS™ pads **specially formulated white resin** will not scratch or stain even when brand new.

These pads are made with a proprietary hybrid resin formula that works great on natural stone wet or dry. And you won't believe what these pads can do on quartzite.
