ZENESIS™ QUARTZITE II

Designed for fabricators who need flawless cuts on quartzite, the Quartzite II delivers exceptionally smooth, chip-free performance on dense quartzites and hard granites. A newly formulated metal bond with premium diamonds provides fast cutting speeds while maintaining superior edge quality. Its super heavy-duty-core - the strongest we've ever produced - ensures maximum stability with near-zero deflection, even during aggressive miter cuts. Built to run true, cut straight, and boost productivity, the Quartzite II is made to conquer quartzite.

- Features 2 Breton and 1 Donatoni hole added to the 14", 16", and 18".

Part No.	Diameter	Segment	Arbor Size
